

GOR

Mission: The central task is to promote the dissemination and use of Operations Research in science and practice. This is done primarily via publications, conferences, working groups and by promoting young scientists.

Founded in 1998

16 working groups

> 1,000 members

GOR Activities

- Annual meeting in September
- Bachelor, Master and Dissertation thesis awards
- Young Researcher Award
- Biennial company award
- Biennial science award
- Triennial joint meeting with neighboring societies

Publications

- OR News – member magazine
- Managing editors of
 - Mathematical Methods of Operations Research
 - OR Spectrum

Working groups

1. Analytics
2. Decision Theory and Practice
3. Environment and Energy
4. Financial Management and Investments
5. Artificial Intelligence, Neural Networks and Fuzzy Systems
6. Game Theory and Behavioral Management
7. Health Care Management
8. Logistics and Transportation
9. Technical Operations Research
10. Practice of Mathematical Optimization
11. Pricing & Revenue Management
12. Forecasting - Methods, Systems and Applications
13. Project Management and Scheduling
14. Simulation and Optimization of Complex Systems
15. Supply Chain Management
16. Information Systems
